

Selcuk Kose

Selcuk Kose Receives NSF CAREER Award

TAMPA, Fla. (January 24, 2014) Electrical Engineering Assistant Professor Selcuk Kose has been awarded a five-year CAREER Award from the National Science Foundation. Kose's award totals \$450,000 over the five years.

The title of the abstract is "Regulator-Gating (ReGa): A New On-Chip Power Delivery." His research focuses on the development and design for circuit structures to optimize voltage distribution to meet the market demand for more power-efficient portable electronics.

-USF-

The University of South Florida is a high-impact, global research university dedicated to student success. USF is classified by the Carnegie Foundation for the Advancement of Teaching in the top tier of research universities, a distinction attained by only 2.2 percent of all universities. The Carnegie Foundation also classifies USF as a community engaged university. It is ranked 44th in total research expenditures and 34th in federal research expenditures for public universities by the National Science Foundation. The USF System has an annual budget of \$1.5 billion, an annual economic impact of \$3.7 billion, and serves 47,000 students in Tampa, St. Petersburg, Sarasota-Manatee and Lakeland.

The College of Engineering at the University of South Florida is ranked at #69 among public institutions by U.S. News & World Report's 2014 engineering graduate school rankings. The college serves 4,600 students offering ABET-accredited undergraduate degrees in seven programs, as well as eleven masters and nine doctoral degrees. The College is actively engaged in local and global research activities with foci on sustainability, biomedical engineering, computing technology and transportation. For the fiscal year 2012 the college had \$28.3 million in research expenditures.
