The College of Engineering has a Part-time Student Programmer Position

The College of Engineering is looking for a student programmer to work up to 20 hours per week during the semester and longer hours during the summer. This position supports ongoing maintenance and development of the College’s website as well as Department and Faculty websites. Hours are flexible to accommodate classes.

Qualified candidates must have the ability to create an asp.net web application and have the following skills:

- Write software from MS SQL Server database
- Write java script enabled web pages
- Ability to work in a collaborative environment to complete various projects.

Knowledge of Dreamweaver and Photoshop a plus. Pay is $15/hour. Send a one-page resume and description of website experience to Janet Gillis, COE Communications Officer janetgillis@usf.edu
